DETAILED ACTION

Oath/Declaration

1. The Oath is missing.

Specification

2. The specification is missing.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The language "FAM" is indefinite because it has not been defined in the claim.

5. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The language "ASRA" is indefinite because it has not been defined in the claim.

6. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The language "ASRA" and "TBAL" are indefinite because they have not been defined in the claim.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-7 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2-8 of U.S. Patent No. 5,849,039. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to optimize the concentrations of the cleaning components to maximize soil removal from garments. The concentration of surfactants and solvent would directly impact dissolution and lifting of the soil or stain from the garment thus would be considered result effective variables.

9. Claims 1-7 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 5,591,236 in view of U.S. Patent No. 5,849,039. While US 5,591,236 does not teach absorbent material, containers with a dispensing spout, rubbing or pressing composition with the spout and the types of stain receivers, US 5,849,039 teach it is advantageous in home dry cleaning to use these types of absorbent material and cleaning methods with similar compositions for stain or spot removal in home dry cleaning. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify

the methods of '236 by incorporating the types of absorbent material and cleaning methods of '039 for the benefit of effective stain or spot removal in home dry cleaning.
